

## ISO CONSULTING SERVICES

Available for ISO 9001:2015, ISO 14001:2015 and AS 9100, Revision D

---

*This program consists of the following elements:*

**ISO Implementation Plan Development and Project Management:**

NEPIRC will assist the client in the development of a comprehensive Quality Management System implementation schedule that identifies all of the required activities to be performed and the associated timing for a successful implementation within the designated and agreed upon end date.

**One-On-One Consulting/Documentation Review:**

NEPIRC will make available to the client on-site consulting and documentation review activities to be utilized at your convenience for specific issues during implementation of the organization's current Quality Management System.

NEPIRC will allocate a pre-determined number of consultative days for support and document review. You will only be invoiced for the actual days of consultative services used. NEPIRC highly recommends that one (1) day be scheduled and utilized as an overview for your management to assure a higher level understanding of the Quality Management System requirements.

**Internal Auditor Training:**

NEPIRC will provide an Internal Auditor course to a maximum of twelve (12) employees in order to train individuals in leading, conducting, reporting and follow-up quality auditing techniques.

**Registrar Selection Assistance:**

NEPIRC will identify registrars that have performed your current standard's registrations within your SIC Code.

**Pre-Assessment Audit:**

NEPIRC will provide a pre-assessment audit using a certified auditor to determine and validate conformance of the Client's Quality Management System to the current standard.
