

MADE IN Northeastern PA

Each month, we recognize one of the region's top manufacturers with the aid of NEPIRC, the Northeastern Pennsylvania Industrial Resource Center. Since 1988, NEPIRC has been working with manufacturers to improve their productivity, profitability, competitiveness and long-term viability through consultative services.

Nivert Metal Supply Has Been Family Run Since 1936

Nivert Metal Supply is a family owned and operated metal distribution business that has served the Northeastern Pennsylvania area for over 75 years.

Louis Nivert has worked at Nivert Metal Supply since 1961 and now serves as President

Nivert Metal is proud of their roots as a family owned business. According to Louis Nivert, "When a long-standing customer calls and says they were able to start their business years ago because my father extended them credit when no one else would, it really means a lot to us."

The company currently has a workforce of nearly 60, many having been with the company for over 20 years. "This year, a few of our salespeople are celebrating their 42nd year with us. We are so grateful for their commitment and hard work over the years," said Nivert.

The company began in 1936 when Albert Nivert started a small metal scrapping business in Scranton, PA. His brother, Harry, later joined him in the business. After multiple local moves and expansions, today Nivert Metal Supply is located in Throop, PA and run by Harry's son, Louis Nivert, who serves as company President.

Nivert purchases various types of metals, mainly from domestic sources, and processes it to meet the specific needs of its customers. With an inventory of over 5,500 tons of metal on hand, in the form of bars, plates, sheets and tubes, Nivert Metal is able to serve a large variety of customers who then use the metal in various applications. Serving customers in primarily Pennsylvania, New York and New Jersey, Nivert customers include machine shops, metal fabricators, intermediary processors and utility companies just to name a few.

Nivert Metal recently hosted students from Scranton Northeast Middle

Over 5,000 tons of metal are in inventory at Nivert's Throop, PA location

School who participated in NEPIRC's "What's So Cool About Manufacturing" video contest. Students toured the company and created a video, while learning firsthand about all of the cool

things Nivert does. Videos were later judged in a regional contest and awards were given in multiple categories.

6" x 10' x 25' capacity flame cutting system

Some of the processes performed include saw cutting, shearing and flame cutting. Flame cutting is the most sophisticated process. After receiving a custom Computer Aided Design (CAD) file from a customer, they use the file to create a custom shape based on the file specifications.
